**of this ordinance}**. All applications for subdivision approval, including final plats, pending on the effective date of these regulations shall be reviewed under the regulations existing at the time such application was made unless the City Council determines on the record that application of these regulations is necessary to avoid a risk of injury to public health, safety, and general welfare. These regulations shall officially be known, cited, and referred to as the Subdivision Ordinance of Clinton City.

#### **26-1-2 Policy.**

(1) Regulation of the subdivision of land and the attachment of reasonable conditions to land subdivision is an exercise of valid police power delegated by the state to this City. The developer has the duty of compliance with reasonable conditions of this Ordinance for design, dedication, improvement, and restrictive use of the land to conform to the physical and economic development of the City and to the health, safety, and general welfare of the future lot owners in the subdivision and of the community at large.

(2) It is declared to be the policy of the city to consider the subdivision of land and any subsequent development of any portion of a subdivided piece or plat as subject to the control of the City pursuant to the General Plan of the City for the orderly, planned, efficient, and economical development of the City.

(3) Land to be subdivided shall be of such character that it can be used safely for building purposes without danger to health or peril from fire, flood or other menace, and land shall not be subdivided unless adequate public facilities and improvements will exist to properly provide for drainage, water, sewerage, and capital improvements such as parks, recreational facilities, transportation facilities, and improvements.

(4) The existing and proposed public improvements shall conform to and be properly related to the master infrastructure plans and the capital budget and program of the City. Land that has been subdivided prior to the effective date of these regulations should, whenever possible, be brought within the scope of these regulations to further the purposes of regulation(s) identified in Section 26-1-4.

**26-1-3 Public Interest.** Any proposed subdivision and its ultimate use shall be in the best interest of the public and shall be in harmony with good neighborhood development of the area concerned, and the subdivider shall present evidence to this effect when requested to do so by the Planning Commission.

**26-1-4 Purpose.** These regulations are adopted for the following purposes:

(1) To protect and provide for the public health, safety, and general welfare of the City.

(2) To guide the future growth and development of the City in accordance with the General Plan.

(3) To provide for adequate light, air, and privacy, to secure safety from fire, flood, and other danger, and to prevent overcrowding of the land and undue congestion of population.

(4) To protect the character, the social and economic stability of all parts of the City and to encourage the orderly and beneficial development of the community through appropriate growth management techniques assuring the timing and sequencing of development, promotion of infill development in existing neighborhoods and nonresidential areas with adequate public facilities, to assure proper urban form and open space separation of urban areas, to protect environmentally critical areas and areas premature for urban development.

(5) To protect and conserve the value of land throughout the City and the value of buildings and improvements upon the land, and to minimize the conflicts among the uses of land and buildings.

(6) To guide public and private policy and action in order to provide adequate and efficient transportation, water, sewerage, parks, playgrounds, recreation, and other public requirements and facilities.

(7) To provide the most beneficial relationship between the uses of land and buildings and the circulation of traffic throughout the City, having particular regard to the avoidance of congestion in the streets and highways and the pedestrian traffic movements appropriate to the various uses of land and buildings, and to provide for the proper location and width of streets and building lines.

(8) To establish reasonable standards of design and procedures for subdivisions and re-subdivisions in order to further the orderly layout and use of land, and to ensure proper legal descriptions and establishment of survey monuments of subdivided land.

(9) To ensure that public facilities and services are available concurrent with development and will have a sufficient capacity to serve the proposed subdivision and that the community will be required to bear no more than its fair share of the cost of providing the facilities and services by requiring the developer to pay fees, furnish land, or establish mitigation measures to ensure that the development provides its fair share of capital facilities needs generated by the development.

(10) To prevent the pollution of air, streams, and ponds; to assure the adequacy of drainage facilities; to safeguard the water table, and to encourage the wise use and management of natural resources throughout the City in order to preserve the integrity, stability, and beauty of the community and the value of the land.

(11) To preserve and/or improve the natural beauty and topography of the City and to ensure appropriate development with regard to these natural features.

(12) To provide for open spaces through the most efficient design and layout of the land, including the use of average density in providing for minimum width and area of lots, while preserving the density of development as established in the zoning ordinance of the City.

(13) To remedy the problems associated with inappropriately subdivided lands.

(14) To provide for safety and security of residents,

subdivisions, commercial properties, and traffic by planning, developing, executing and requiring a city wide street lighting and general lighting design and requirement.

**26-1-5 Availability of Utility Services.** No development, nor permit for development, shall be granted, approved, or issued unless the necessary public facilities in the applicable area have been determined to exist and have adequate capacity to accommodate the proposed development and are available or are to be available when the development occurs. #### **26-1-8 Interpretation, Conflict, and Severability.**

(2) Public Provisions: These regulations are not intended to interfere with, abrogate, or annul any other ordinance, rule or regulation, statute, or other provision of law except as provided in these regulations. (3) Private Provisions: These regulations are not intended to abrogate any easement, covenant or any other private agreement or restriction, provided that where the provisions of these regulations are more restrictive or impose higher standards or regulations than such easement, covenant, or other private

agreement or restriction, the requirements of these regulations shall govern. Where the provisions of the easement, covenant, or private agreement or restriction impose duties and obligations more restrictive or standards that are higher than the requirements of these regulations, or the determinations of the Planning Commission or the City Council in approving a subdivision or in enforcing these regulations, and such private provisions are not inconsistent with these regulations or determinations thereunder, then such private provisions shall be operative and supplemental to these regulations and the determinations made under the regulations.

(4) Severability. If any part or provision of these regulations or the application of these regulations to any person or circumstances is adjudged invalid by any court of competent jurisdiction, as provided by Utah law, the judgment shall be confined in its operation to the part, provision, or application directly involved in the controversy in which the judgment shall be rendered and it shall not affect or impair the validity of the remainder of these regulations or the application of them to other persons or circumstances. The City Council hereby declares that it would have enacted the remainder of these regulations even without any such part, provision, or application which is judged to be invalid.

**26-1-9 Savings Provision.** These regulations shall not be construed as abating any action now pending under, or by virtue of, prior existing subdivision regulations, or as discontinuing, abating, modifying, or altering any penalty accruing or about to accrue, or as affecting the liability of any person, firm, or corporation, or as waiving any right of the City under any section or provision existing at the time or adoption of these regulations, or as vacating or annulling any rights obtained by any person, firm, or corporation, by lawful action of the City except as shall be expressly provided for in these regulations.

**26-1-10 Reservations and Repeals.** Upon the adoption of these regulations according to law, the Subdivision Regulations of Clinton City adopted April 9, 1985, as amended, are hereby repealed, except to the extent expressly retained in these regulations.

The Board of Zoning Adjustments is bound by Utah law governing variances, currently found at Utah Code Section 10-9a-702, and may only grant a variance if the application meets the requirements found therein.

**26-1-13 Development Guidelines and Design Standards.** The Community Development Director with the assistance of the City Engineer, or a designee of the City Engineer may draft, interpret and recommend a set of development guidelines and design standards for subdivision approvals in the City.
